## SOLAR ENERGY & SENSOR BASED ENERGY CONSERVATION

In our college, we use two types of solar energy based equipments:

1. Solar Water heater in hostel to provide hot water to students in winter season & to kitchen throughout the year
2. All the Street lights in our college premises are Solar Energy based. These street lights are of two models:
  - a. Having External Battery to store solar energy in the day time and consume in the same from evening.
  - b. Having inbuilt battery to store solar energy in the day time and consume in the same from evening.

All these street lights are sensor based also, so they automatically gets switched on in the evening and gets switched off in the morning.
